=====
State Comments:

In October of 1986, RR Donelly was issued a notice of complaint and proposed final order. The complaint cited Donelly for spreading potentially hazardous wastes on the ground by their Railroad Tracks. Pursuant to the final order, Donelly was required to submit a sampling plan to determine the extent, if any of soil contamination.

Subsequent sampling determined the materials dumped on site to be non-hazardous. Donelly has been ordered to cease dumping of wastes of any kind on site. Since no hazardous wastes were found contaminating the soil, there is no threat to population or environment at this time. The State recommends no further action. All hazardous wastes are sent to permitted landfills.
